India conducted the sixth round of the National Family Health Survey (NFHS-6) in 2023-24 under the Ministry of Health and Family Welfare (MoHFW). All aspects of the survey have been coordinated by the International Institute for Population Sciences, Mumbai. The survey has been implemented by a group of survey organisations and Population Research Centres. NFHS-6 provides estimates of the levels of fertility, infant and child mortality, and other family welfare and health indicators by background characteristics at the national and district levels. It measures trends in family welfare and health indicators over time at the national and district levels. This workshop jointly organised by Madras Institute of Development Studies (MIDS) and School of Public Health, SRM Institute of Science & Technology (SRMIST) will cover in-depth the many aspects of the findings of the survey.
